

Mr. R. M. McCabe
NIST
100 Bureau Dr. Stop 8940
Gaithersburg, MD 20899-8940

TO: R. M. McCabe:

I wish to participate in the development of the revision to the American National Standard Data Format for the Interchange of Fingerprint, Facial, & SMT Image Information (ANSI/NIST-ITL 1-2000) being sponsored by NIST.

As a canvasee and member of the consensus body, I agree to thoroughly review any such proposed American National Standards that are submitted to me for approval and to process and return the letter ballots that accompany them within the designated time interval. If I am unable to take action on any letter ballot, I will designate my alternate (if any) to act in my stead.

My participation shall be that of a _____ Canvasee _____ Alternate.
(Check one)

My interest category is: _____ User _____ System Integrator
(Check one) _____ Producer _____ General Interest
_____ Consultant _____ Other _____

CANVASSEE INTEREST CATEGORIES

USER:

End-users who are individuals or organizations requiring the product or service to accomplish required functions or responsibilities. This category includes agencies and personnel that capture fingerprints or mugshots; personnel that perform examinations or comparisons of fingerprints or mugshots; administrators and personnel responsible for the storage and processing of the information; and those involved in the planning and procurement of their organization's systems to capture, store, and process the information.

PRODUCER:

Manufacturers, or vendors who directly manufacture or sell equipment, expendable media, and systems, or function as service bureaus to individuals or agencies. This category includes the AFIS system vendors, camera manufacturers, and booking station vendors.

CONSULTANT:

Those private individuals or organizations that provide advice and system analysis functions to other agencies or organizations regarding the planning, procurement, and acquisition of equipment, systems, or systems. Generally, those classified as consultants have no relationship with their client organization other than as a hired contractor.

SYSTEM INTEGRATOR:

Individuals or organizations that provide and integrate one or more manufacturers' equipment combined with software to function as a system. These value-added turnkey systems are designed for use by client agencies or organizations. Generally, these systems are capable of performing several different tasks that use and administer very large databases.

GENERAL INTEREST:

Individuals or organizations that have a direct or material interest in the development of the standards activity but cannot be classified in any of the other categories. For example, universities or other research-oriented groups may be classified in this category. Another example is organizations whose products or services are not directly involved in the standards activity but must potentially or directly interoperate with such an activity.
